

Fylde turn-key Solutions

Fylde Micro are uniquely positioned to offer independent, impartial advice on all RF manufacturers equipment. This enables Fylde to deliver custom built systems to exacting requirements incorporating equipment from the RF partner of their choice. With systems in over 60 countries and 21 years experience in the design and supply of MPT networks. Fylde have earned the reputation as the premier MPT partner of choice.

Comprehensive training..

Fylde provide comprehensive training for operators engineers and system managers. Either at the customer's site or at Fylde's purpose built training facility.

Racked Solutions..

Fylde offer a range of budget and professional racking solutions. The budget series is perfect for the more cost sensitive installation where a fully closed system is not required, for example in a controlled environment such as a private equipment room with climate control. The professional racking systems suit smart control rooms and shared equipment spaces.

Unique Features..

- 21 years of experience in design & manufacture of MPT equipment.
- Industry Independent status.
- Design and build or equipment supply.

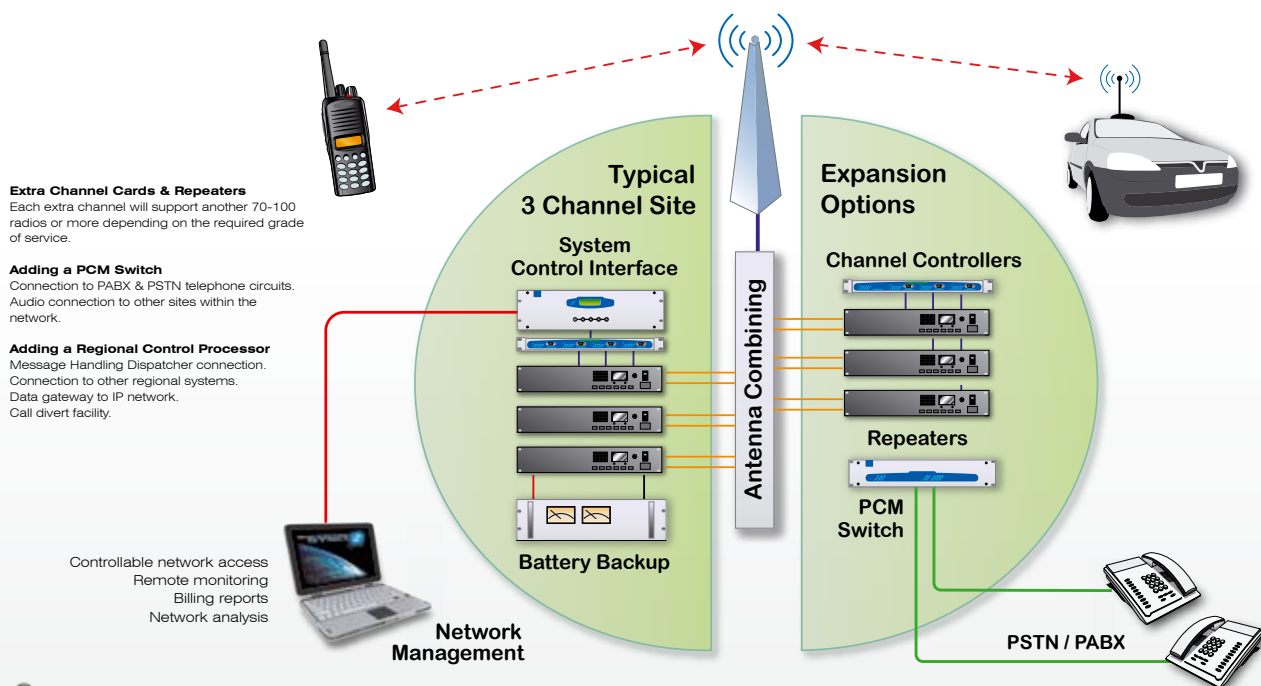

From left to right - Fylde Message Handling Dispatcher (MHD) Fylde Network management (SYSCON) and Fylde personnel / vehicle tracking and mapping solution.

Fylde Micro's software applications are designed for desktop computers running smoothly alongside other Microsoft Windows® based applications.

Expandable from a single radio site, single channel all the way up to 800 plus radio sites, all from one product. Fylde systems allow network operators to expand features and functionality by simply adding components to their network, for example, adding an extra Channel Card & Repeater will allow for up to 70 to 100 extra radios or more on the network (depending on the the required grade of service).

KENWOOD

As part of the Fylde Turn-key solutions we are delighted to offer the Kenwood range of MPT1327 products including these GPS ready mobile and portable radios.
